    - Check-in: 10-Aug-2026 at 3:00 PM.
    - Hotel policies and cancellation terms accepted.
- These examples demonstrate how the Basic Room Booking Form captures different guest requirements, room preferences, meal plans, amenities, special requests, and scheduling details in an organized Room_Booking_Report.

## Overview of the Basic Room Booking Report

The **Room Booking Report** in Zoho Creator displays the details of submitted hotel room bookings in a structured table. The report contains **only the 13 Basic Fields** from Sections A–D.

It includes:

- **Guest Name**
- **ID Proof Number**
- **Number of Guests**
- **Email Address**
- **Contact Number**
- **Permanent Address**
- **Room Type**
- **Meal Plan**
- **Amenities Required**
- **Special Requests**

- **Check-In Date**
- **Preferred Check-In Time**
- **I agree to the hotel's policies and cancellation terms**

The report allows hotel staff to view the submitted guest and booking information in one place. It can be used to review guest details, room preferences, meal plans, required amenities, special requests, scheduled check-in information, and policy acknowledgement.

The Basic report therefore provides a simple and organized view of the hotel bookings without including any Advanced fields such as Room Inventory, Guest Photo, Payment, QR Code, Signature, or system-generated values.

# Conclusion

The Hotel Room Booking System was successfully developed in Zoho Creator using the Basic Fields. The application captures essential guest, contact, room preference, and scheduling details through a structured booking form and stores the information in the Room Booking Report. The report provides an organized view of all submitted bookings, enabling hotel staff to efficiently manage reservations and access guest information. Overall, the system demonstrates a simple, user-friendly, and effective hotel room booking solution.
