Hotel Dashboard with Quick Actions and Recent Activity:Dashboard showing quick actions, recent activity, check-in reminders, quick tips, and hotel policy information.

Summary

The Hotel Booking Command Center is a centralized workspace in Zoho Creator designed to help hotel staff monitor and manage bookings efficiently. It combines 11 Page Builder elements to display occupancy, room popularity, guest details, booking statuses, and reports. It also provides walk-in booking, hotel policies, guest ID viewing, check-in reminders, and housekeeping updates. The following screenshots illustrate the layout and functions of the dashboard
